

Material Measurement Order Form

(Prices valid until December 2015)

Modeling

Photopia customers or material manufacturers may purchase our material measurement services to add new materials to the Photopia library. The following rates for material measurements are for generally available and proprietary materials. Generally available materials are materials that are available to the general public or OEM's. Proprietary materials are materials that your company manufacturers for your company's use only. LTI Optics retains the rights to material measurements for generally available materials. Thus, generally available materials can be added to the general material library at the discretion of LTI Optics. Proprietary material measurements' distribution will be at the sole discretion of the client.
